Major Tasks / Target Dates / Summary & Forecast

Video uploading accepts mp4's, can easily expand to accept other formats (Zach). Basic session allows persistent login, though session seems "too" persistent right now (Mikel).

Video player undergoing visual changes to be more appealing to the eye and have an easier-to-follow layout (Hunter). Sessions allow profile page to be designed (Ashton).

Login and registration pages undergoing visual changes (Logan). We need to discuss how we want to categorize video uploads and into what categories, but it's simple to implement.

I hope to have our site outward-facing and publicly accessible from anywhere on the Internet by the end of the semester. I think we can accomplish that.
